

## MANDATORY DRIVER REQUIREMENTS:

- All drivers must register with ISR and receive ID number before they will be allowed to race. Register at [www.isrracing.org](http://www.isrracing.org)
- Helmets are required to be **DOT and SNELL 2010** or **ECE 22.05** and 75% orange.
- The back of the driver's jacket will require 144 square inches (12"x12") of **orange** and **include their sled number**.
- Eye protection (Goggles or helmet shield).
- Over the ankle boots.
- Shin (with knee) guards.
- ISR approved Safety/TekVest will be required in all classes.
- Elbow pads are recommended but not required.

## MANDATORY SLED REQUIREMENTS:

- Tether cords in proper working order are mandatory.
- All sleds must be equipped with stock OEM chain tensioner bracket, puck and brake band bracket. Excluded from this are F1 and F3.
- All sleds must be equipped with functional brakes, chain and clutch guards.
- All sleds must have a battery operated light (bicycle light) on the back of the sled, even if they have a working taillight.
- To aid in steering safety, heim joints, steering rods, and handlebar hooks will be allowed in all classes. (See hooks in stock class in ISR Book)
- The color orange is **not** permitted on any sled; any visible orange must be removed or concealed.
- Drivers number must be **clearly** visible on both sides of the sled and **at least 6-8" high**.
- **FUEL:** Alcohol, oxygenated/reformulated gas or fuel additives may **not** be used. Fuel will be periodically checked and must meet ISR and Digatron specs. **These fuels are toxic, dangerous and cause serious health effects.**
